DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The abstract is amended below to comply with MPEP 608.01 (b) (i.e. the abstract may not exceed 150 words in length):

This invention is directed to the method and system of providing a contact information regarding the owner of a telephone number (to be referred as "call number" in this application) and the system to implement it. According to the invention, a method of providing a call number owner's information to a wired or wireless communication terminal through an information communication network, comprises comprising the steps of: (a) receiving a call number owner's information that includes at least a call number and a call number owner's name or its business name, from a plurality of call number owner's terminals and storing it; (b) receiving a call number taken from any one of a list of absent calls, received calls or sent calls held in a memory of the communication terminal, for which call number the owner's information is required by a call number management program run on the communication terminal; (c) reading the call number owner's information corresponding to the received call number in said (b) step from the stored call number owner's information in said (a) step and transmitting the information to the call number management program; (d) pairing the call number

~~with a communication terminal number to which the call number owner's information is transmitted in said (c) step and to store the pair data as a backup record; and (e) using the call number management program to automatically generate a call number store by matching the corresponding call number owner's information transmitted in said (c) step with the received call number in said (b) step, and storing it in the memory of communication terminal.~~

Allowable Subject Matter

2. Claims 1-5, 9-15, 20, and 21 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach a method and system for sending a list restoration request to the service provider's system, and means for responding to such a request by reading from a database call numbers corresponding with the owner terminal number from a backup list, together with the call number owners information for the call numbers and transmitting the data to the call number management program, as substantially described in independent claims 1, 11, and 21. These limitations, in combination with the remaining limitations of claims 1, 11, and 21, are not taught nor suggested by the prior art of record. Claims 2-5, 9, 10, 12-15, and 20 are dependent from claims 1 and 11 and are therefore allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL T. THIER whose telephone number is (571)272-2832. The examiner can normally be reached on Monday thru Friday 7:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Edouard can be reached on (571) 272-7603. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
